Attack Type Wheel

Gym Leader and Elite Four/Champion rosters (next two sections) tag each Pokémon with an ATK type computed from this wheel — Trainer Class encounters roll a fully random attack type instead, so they aren't tagged.

Slot	Rule
1, 5, Ace	Primary type, no shift
2	Secondary type (or primary, if mono-type)
3	Primary type, shifted 1 step clockwise on the wheel
4	Primary type, shifted 1 step counterclockwise on the wheel

Gym Leaders

Any order. "Badges" = badges held entering the fight (this gym not yet counted). Send order is always Slot 5, 2, 3, 4, then Slot 1 (Ace) last, among whichever slots are unlocked. Roster cells show ATK (this game's attack-type mechanic, not the same as the Pokémon's own type) and level. Below each roster table: the full evolution line for every slot, with dex #, type, die-faces, and what each stage evolves via.
